

Introduction to Algorithms

Module 6.5: Practice Day 01

(GeeksforGeeks, CSES, LeetCode)

Topics:

1. Cycle Detection
2. BFS
3. DFS

Problem Links:

1. [Detect cycle in an undirected graph](#) [GFG] - [Solve this using BFS]
2. [Detect cycle in an undirected graph](#) [GFG] - [Solve this using DFS]
3. [Course Schedule](#) [Medium]
- Asked in [Google, Facebook, Amazon, Apple, Microsoft]
[solution link](#)
4. [Find Eventual Safe States](#) [Medium]
- Asked in [Google]
[solution link](#)
5. [Counting rooms](#) [CSES]

XPSC Problem Links:

6. [A. Fashionable Array](#)
7. [A. Dr. TC](#)

Extra Problems From Mod 5 & 6(Optional):

8. [Maximum number of fish in a grid](#) [Medium]
- Asked in [Adobe]
[solution link](#)
9. [Surrounded Regions](#) [Medium]
- Asked in [Google, Facebook, Amazon]
[solution link](#)

10. **Battleships in a Board** [Medium]
 - Asked in [Google, Facebook, Amazon, Apple, Microsoft]
[solution link](#)
11. **Minimum Number of Vertices to Reach All Nodes**
 - Asked in [Google]
[solution link](#)
12. **Shortest Path in Binary Matrix**
 - Asked in [Google, Facebook, Amazon]
[solution link](#)
13. **Number of Enclaves** [Medium]
 - Asked in [Google]
[solution link](#)
14. **Number of Provinces** [Medium]
 - Asked in [Google, Facebook, Amazon]
[solution link](#)
